US NAVY LASER WEAPON SYSTEM

First deployed, ship based laser weapon system on the USS Ponce relies on InfinAlign.

Key Features

- InfinAlign ultra-high precision boresighting stages provide stable, locking sub miliradian pointing accuracy.
- Quickly align and lock with zero backlash.
- InfinAlign is the solution for lasers, optics, cameras, sensors, surveillance equipment or virtually any instrumentation or equipment that requires precise stable pointing or boresighting
- Available in load capacities from ounces to several hundred pounds
- Contact us for your specific needs.
